

CALIFORNIA MULTIFAMILY HOUSING / SOLAR QUALIFICATIONS

Bring solar to your affordable housing portfolio.

No upfront capital. Full-service system care. Start with your property.

01 Property

At least five rental units with qualifying affordable-housing restrictions.

02 Metering

Individually metered units and an eligible California utility or CCA.

03 Qualification

Meet an applicable income, community, tribal or public-housing eligibility route.

04 Roof and utilities

Review property status, roof conditions, electrical service and utility requirements.

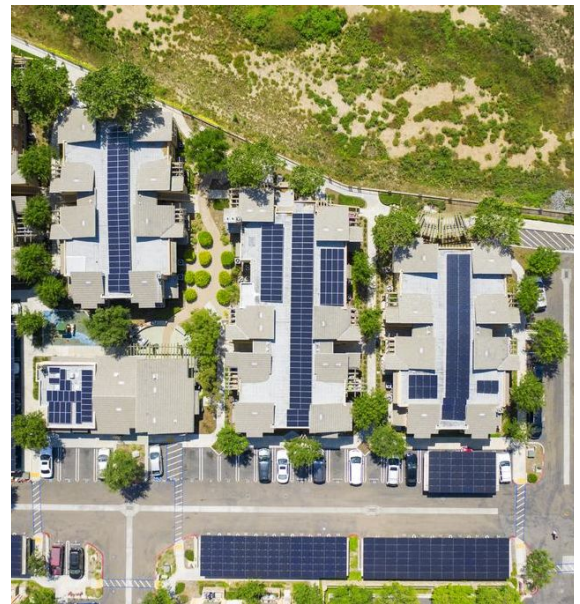

Photo: DAC Energy.

Start with these property details

Send Dan your property address and unit count. Include your utility bills, meter setup and affordability documentation. Add the roof's age and any planned roof work so we can get your property review underway.

Install solar with no upfront capital investment. Purchase the electricity it generates at a contracted rate under DAC's 20-year Solar Services Agreement. Program eligibility and site approval apply.

Get your solar proposal started.
