

COLD IN TRANSIT. VALUE IN EVERY DEGREE.

Phase change thermal storage helps stabilize refrigerated containers and reduce cooling runtime.
Faster pull-down. Less condensation. More temperature stability.

ESTIMATED ANNUAL SAVINGS PER CONTAINER

One-container illustration

Assumed annual refrigeration energy cost:
\$20,000 per container

<i>Assumed reduction</i>	<i>Annual savings</i>
10%	\$2,000
20%	\$4,000
30%	\$6,000
